

HOW TO INTEGRATE WITH AMERICAN'S NDC

SEPTEMBER 2017

Option 1: Work with an NDC Aggregator

- NDC aggregators are third party technology companies specializing in NDC integrations with airlines, including American.
- This option may be the right fit for travel agencies who prefer an off-the-shelf solution rather than deploying IT resources to integrate directly.

Examples of IATA Level 3 Certified Aggregators

Option 2: Integrate directly with American

- This option may be the right fit for large travel agencies, TMCs, and technology providers who prefer complete control over their technology and have IT resources available to complete an integration project with American.
- A typical integration project lasts between 3-6 months.
- Please send an email to ndc@aa.com to learn more.

Option 3: Utilize SPRK

- SPRK is an out-of-the-box web application that offers American's full range of NDC content and functionality and an easy to use graphical user interface.
- Many travel agencies using NDC choose SPRK for post-ticketing services.
- Simple to set up and completely free for travel agents to use.
